basicDIM Wireless Module and User Interface

The intuitive move towards wireless
luminaire communication

TRIDONIC

Hassle-free wireless

The intuitive path towards wireless luminaire communication

basicDIM Wireless control technology allows versatile and professional interaction with all luminaires within an area – fully intuitive and with no additional wiring required.

The basis for the wireless light management is found in the luminaire with the LED module, a DALI driver and the basicDIM Wireless module. The control profiles are saved during the luminaire production stage. Users can choose whether to control the lighting using the 4remote BT App or via the user interface.

Up to 127 light points can be conveniently controlled via Bluetooth: switching on and off as well as dimming functions are just as simple as grouping luminaires and creating lighting settings. Tunable White luminaires change their colour temperature to suit the user and the direct and indirect light content are simple to adjust. All the elements for integrating sensors are also in place.

basicDIM Wireless is the ideal solution for updating conventional lighting without requiring any additional construction effort. There are hardly any limits to the usage area with this. In office buildings for instance, each room and zone benefits from the system's easy-to-use and multi-functional intelligence.

The benefits for the luminaire manufacturer (Production) at a glance

- Simple configuration
- Define luminaire properties
- Allocate luminaire properties wirelessly

The benefits for the commissioning engineer (Installation) at a glance

- Commission, programme and control luminaires intuitively via the 4remote BT App
- Locate and assign luminaires wirelessly with ease
- Adapt the system quickly

The benefits for the building operator at a glance

- Simple updates
- Reduce power consumption
- Ensure multi-functional use for rooms
- Individual wireless light adjustments

The benefits for the user at a glance

- Individual operation for luminaires
- Simple graphic luminaire selection
- Intuitively adjust the light shade and intensity

Options for use

Selection of settings

Saved settings can be accessed quickly and adjusted to the planned room usage

Colour temperature

The light shade can be adjusted individually in accordance with the luminaires used

Dimming options

between 1% and 100%

Presence detection

Light to suit requirements through integration of sensors

Scheduling

Scheduling possible using internal clock and calendar

Customisation

Adjustments for changes to usage requirements or for system expansion

Group circuit system

Control for individual luminaires and groups adjustable to usage requirements at any time via the 4remote BT App. Simple subsequent expansions through wireless installation

Technology that creates added value

Wireless usage options in an office building

Open-plan offices

Save energy in open-plan offices

A large number of luminaires and long operating hours provide significant potential for CO₂ savings. Just switching from conventional T8 lighting to LED reduces energy costs by 40 %. With basicDIM Wireless the luminaires can be dimmed without any DALI wiring, which can reduce energy costs by a further 20%.

Main benefits: Up to 60% energy savings

Control concept: Dim (groups of) luminaires automatically, depending on the time of day

Commissioning: Light settings set automatically with individual control options available

Individual operation: Switch on and off, access settings, dim the lighting

Comparative calculation*

	T8 luminaires	LED luminaires	Dimmed LED luminaires
Lighting	30 luminaires 4 x 18 W	26 luminaires 4,200 lm	26 luminaires 4,200 lm
Total output	2,200 W	1,326 W	1,326 W
Annual power consumption**	7,992 kW/h	4,774 kW/h	3,197 kW/h
Annual electricity costs***	€1,598	€955	€639
Annual savings		Forty percent	Sixty percent

* Schedule: 7–10 a.m.: 100%; 10 a.m. – 12 noon: 75%; 12 noon – 2 p.m.: 50%; 2 p.m. – 3 p.m.: 75%; 3 p.m. – 4 p.m.: 100%
** Operating time 12 hours per day, 300 working days per year
*** EUR 0.20 per kW/h

Conference rooms

Flexible design options for conference rooms

Multi-functional areas provide a space where work alternates between presentations, discussions and teamwork. The different activities require lighting solutions that can be adjusted quickly and easily to the current situation, along with light settings that are easy to access.

Main benefits: Different light settings that can be accessed for alternating activities in the area

Control concept: Group luminaires and define settings

Commissioning: Light settings set automatically with individual control options available

Individual operation: Switch on and off, access settings, dim the lighting

Offices

Upgrade offices for one or two people

Various office activities such as computer work, brainstorming sessions or telephoning are easier if the direct and indirect sections of the lighting can be adjusted quickly and simply to the relevant needs and requirements. Personalised light also achieves a cost-saving element through incorporation of presence sensors.

Main benefits: Personalised lighting moods, energy savings

Control concept: Modify and dim indirect/direct light distribution, define groups and settings, detect presence

Commissioning: Light settings set automatically with individual control options available, modify the direct/indirect sections

Individual operation: Dim direct and indirect light sections separately, access personal settings via the 4remote BT App

Breakout zones

Live up breakout zones

Breakout zones offer space for a wide range of activities – from a cosy lunch break through to inspiring brainstorming sessions and relaxed after-work drinks. Adjustable light settings create the right atmosphere at any time. Tunable White luminaires provide the most appropriate light atmosphere by using alternating light shades, illuminating the space with a soft or energising light as required.

Main benefits: Inspire, design and illuminate with light shades

Control concept: Change the colour temperature (Tunable White), dim lighting, define groups and settings

Commissioning: Automatically set light settings with colour temperature progress and available individual control options

Individual operation: Switch on and off, adjust light shades, access settings, dim lighting

System structure

Compatible with Tridonic's DALI range

Wireless communication starts in the luminaire. The user uses the 4remote BT App or user interface to communicate with the basicDIM Wireless modules, which forwards the information to the LED module via the PREMIUM DALI driver or the 24 V constant voltage driver.

At a glance: basicDIM Wireless Module

- DALI Wireless Module
- Forms automatically a wireless communication network with up to 127 nodes

Convenient from configuration to use

The basicDIM Wireless module integrated into the luminaire allows convenient, wireless interaction with luminaires, including configuration as well as commissioning and actual use. Easy control via Bluetooth is already visible on the compact user interface. The lighting control system can also be operated via the 4remote BT App, which perfectly complements the modules and drivers from Tridonic.

At a glance: basicDIM Wireless passive Module

- Power supply via DALI power line (po4a driver PRE or DALI power supply)
- Perfect integration into basicDIM Wireless's simple wireless light control

Wireless modules with powered DALI power supply

The basicDIM Wireless passive module does away with the need for an additional mains line – one DALI power supply, either via the new po4a driver PRE or via a traditional separate DALI mains supply, is enough to modernise individual luminaires to areas as large as entire offices or corridors.

At a glance: basicDIM Wireless User Module PMW constant voltage (CV) 4CH

- Can be combined with 24 V constant voltage drivers and applications
- Input voltage: 12 – 24 V
- Up to 4 LLE FLEX tapes together

Easy-to-dim LLE FLEX continuous row

The constant voltage (CV) basicDIM Wireless module is the ideal solution when you want to add a dimming function to existing accent lighting consisting of LED light lines without undertaking structural measures. Combined with non-dimmable 24 V CV drivers, an individual control module can dim up to four LLE FLEX module strips.

Order information

NEW	Type	Item no.

System structure

basicDIM Wireless integrated Driver premium series (PRE)

Thanks to the premium (PRE) driver series with integrated basicDIM Wireless technology, luminaires can be constructed with even greater ease.

The advantages of drivers with integrated basicDIM Wireless technology

With premium (PRE) series drivers, just one device needs to be installed for each luminaire, saving a huge amount of space. Since no additional wiring is required, costs are reduced significantly, too.

At a glance: basicDIM Wireless Driver constant current PRE (CC)

- Dimmable built-in constant current LED Driver
- Can be either used build-in or independent with clip-on strain-relief
- Adjustable output current via ready2mains Programmer, basicDIM Wireless or I-select 2 plugs
- Nominal life-time up to 100,000 h, 5-year guarantee

At a glance: basicDIM Wireless Driver constant voltage PRE (CV)

- Dimmable 24 V constant voltage LED Driver for flexible constant voltage strips
- Small design with stretched-compact strain relief
- basicDIM Wireless enables different dimming options 1 to 100 %
- Nominal life-time up to 50,000 h, 5-year guarantee

At a glance: basicDIM Wireless Driver Tunable White PRE (TW)

- Independent dimmable constant current 2-channel LED Driver
- Adjustable output current via basicDIM Wireless or I-SELECT 2 Plug
- Nominal life-time up to 100,000 h, 5-year guarantee

basicDIM Wireless Driver premium series (PRE)

basicDIM Wireless demonstrates its user-friendly control options at all stages with the free 4remote BT App or the User Interface.

Define luminaire properties

The luminaire manufacturer saves the properties that define the luminaire via 4remote BT App profiles. These parameters include dimmability, Tunable White and direct/indirect light content.

Commission the system intuitively

The 4remote BT App automatically detects the luminaires that are switched on. Subsequent location, designation, illustration and grouping of the luminaires is very simple.

Make use of light

The user can communicate directly with the luminaires and customise these via traditional 4remote BT App or User Interface functions. The result is an entirely new method of light control that is very convenient at the same time.

Controlling light intelligently

SMART interface is a compact in-built solution for smart luminaires. It provides maximum convenience and outstanding energy efficiency without the need for any additional control unit.

Light for every mood

basicDIM features lighting control that takes into account the presence of users and ambient light. Besides being suitable for master/slave luminaires, this efficient system wins out in particular thanks to software-free installation.

Convenient light

comfortDIM concentrates on straightforward design, easy installation and flexible configuring on every floor of a building.

Innovative light

connecDIM provides an excellent platform for smart, cost-effective and user-friendly control and lighting management.

A complete Tridonic lighting solution system from a one-stop supplier, from the light source right through to the lighting management system.

As an international company, Tridonic is represented worldwide by 30 branch offices and partners in 73 countries.
